

Veterinarian Shortage Situation Nomination Form

To be completed by the chief State or Insular Area Animal Health Official or his/her designee

Veterinary Medicine Loan Repayment Program (VMLRP)

Nomination of Veterinarian Shortage Situations for the Veterinary Medicine Loan Repayment Program (VMLRP) Authorized Under the National Veterinary Medical Service Act (NVMSA)

Note: Please submit one separate nomination form for each position. See solicitation for number of nominations permitted for your state or insular area.

Veterinary Shortage ID Code: OK113

Location of Veterinary Shortage Area for this Nomination

Note: If this nomination is for a public practice position, please provide the location of the home office or the center of service area.

Johnston and Coal Counties, Oklahoma

Location of Veterinary Shortage:

(e.g., County, State/Insular Area)

Center of Service Area or
Location of Position:

Tishomingo in Johnston County and Coalgate in Coal County

(e.g., Address or Cross Street, Town/City, and Zip Code)

Type of Veterinary Practice Area/Discipline/Specialty

Type I Shortage: Private Practice

Food Animal Medicine (at least 80 percent time)

Please select **one or more** specialties requested for this position:

- Beef Cattle
- Dairy Cattle
- Swine
- Poultry
- Small Ruminant
- Other _____

Type II Shortage: Private Practice – Rural Area

Food Animal Medicine (at least 30 percent time)

Please select **one or more** specialties requested for this position:

- Beef Cattle
- Dairy Cattle
- Swine
- Poultry
- Small Ruminant
- Other : _____

Type III Shortage: Public Practice (at least 49 percent time*)

Employer: _____ Position Title: _____

Please select **one or more** specialty/disciplinary areas.

- Food Safety
- Public Health
- Epidemiology
- Other: _____

Please describe the objectives of a veterinarian meeting this shortage situation as well as being located in the community, area, state/insular area, or position requested above (limit your response to 200 words or less).

(Statistics used in all responses within this document courtesy of NASS 2007 Census of Agriculture and the Oklahoma Board of Veterinary Medical Examiners.)

In assessing the overall need for food and fiber veterinarians in Oklahoma, it has become apparent that there are many counties, regions and practice types that should be considered as areas of critical need. South eastern Oklahoma has a rich history as a traditional beef cow calf, swine, small ruminant and poultry production area. These counties have suffered during the economic instability created by the current banking and industry losses, and we have seen a return to a more vigorous emphasis on animal agriculture. Due to the size of communities in this area, this is a Type I critical need. In Johnston County there is only one veterinarian and she does less than 20% large animal medicine. In Coal County there is only one veterinarian engaged in food and fiber veterinary practice. The objective for this two county region is to meet the need of cattle, swine, poultry and small ruminant raising stakeholders and to offer vital and needed relief to the two private veterinarians working to meet this need. The State of Oklahoma would expect a veterinarian meeting this shortage situation to devote 80% or greater of his or her time in the practice of food animal medicine.

Please describe the activities of a veterinarian meeting this shortage situation and being located in the community, area, state/insular area, or position requested above (limit your response to 200 words or less).

The principle day-to-day professional activities expected of a veterinarian meeting the needs of this two county area shall focus on beef and dairy cattle, swine, poultry and small ruminant practice to include; ambulatory as well a clinical services, herd health, obstetrics, nutrition, client education, diagnostics, preventative health care, surgery, breeding management, foreign animal disease recognition, antimicrobial use education and tissue residue prevention education. This veterinarian shall comply with the Oklahoma Practice Act, be accredited with USDA APHIS Veterinary Services, adhere to the statues and rules of the of the State of Oklahoma covering disease and animal movement and work with the State Veterinarian to insure the health of the herd and flock of the State of Oklahoma. It is paramount for the safety of the food supply, the health of the meat and fiber national and international markets and the health and safety of the American consuming public that veterinarians dedicated and versed in veterinary medicine, foreign animal disease, zoonotic disease and appropriate use of antimicrobials are available in this area of our state.

Please describe any past efforts to recruit and retain a veterinarian in the shortage situation identified above (limit your response to 100 words or less).

The two practices within this two county region have made multiple attempts to recruit veterinarians. Due to the remote location and the lack of a town of significant size, the perception has been that the quality of life for families would be less than desirable. There are excellent school systems in both communities. It is a fact that veterinarians graduating from our veterinary colleges today are going into small animal medicine and seeking employment in larger communities. The Oklahoma State College Veterinary Health Sciences prepares food and fiber veterinarians well to meet the needs of industry. The school has two rural practice recruitment programs, a rural practice summer camp for high school juniors and seniors and a food animal track with job placement. Neither of these programs has been successful. Graduating veterinarians seek a standard and quality of life for themselves and their families, jobs for spouses, good schools and social opportunities. This debt repayment program will allow recipients to purchase homes, enjoy a better quality of life, remain in rural communities and repay loans that can hamper families struggling to survive in today's economy.

Note: One of the above mentioned veterinarians is no longer practicing in this area.

Please describe the risk of this veterinarian position not being secured or retained. Include the risk(s) to the production of a safe and wholesome food supply and to animal, human, and environmental health not only in the community but in the region, state/insular area, nation, and/or international community (limit your response to 250 words or less).

The consequences of not filling this critical need are many and varied. First and foremost is the protection of the food supply and the cost to consumers in the event of a Foreign Animal Disease outbreak or a food borne pathogen event. Animal health begins on the farm and ranch, food safety begins on the farm and ranch. In the U.S., we must take a farm to fork approach to a safe and abundant food supply. This grass roots approach puts the food animal practitioner in a pivotal and critical roll in education, disease recognition, disease mitigation and foreign animal disease reporting. We need and we must have educated, excited and dedicated veterinarians on the ground in areas of animal agriculture And without this program that will not happen in remote and critical deficit counties, regions, and states.

Please indicate whether you consider this situation/position a candidate for a "service in emergency" agreement (limit your response to 100 words or less). Please see solicitations for additional information regarding the obligation of participants who enter into the "Service in Emergency" agreement.

Authorized State or Insular Area Animal Health Official or designee:

Name: Becky L. Brewer-Walker

Title: Oklahoma State Veterinarian

Organization: Oklahoma Dept. of Agriculture, Food and Forestry
