 Food Animal Medicine (at least 30 percent time)
 Please select **one or more** specialties requested for this position:

- Beef Cattle
- Dairy Cattle
- Swine
- Poultry
- Small Ruminant
- Other : _____

Type III Shortage: Public Practice (at least 49 percent time*)
 Employer: _____ Position Title: _____
 Please select **one or more** specialty/disciplinary areas.

- Food Safety
- Public Health
- Epidemiology
- Other: _____

Please describe the objectives of a veterinarian meeting this shortage situation as well as being located in the community, area, state/insular area, or position requested above (limit your response to 200 words or less).

The veterinarian will offer food animal veterinary services to area, which includes Alamosa, Conejos and Costilla counties. This is a dense cow/calf area with one veterinary clinic serving the entire three-county area. The target food animal industries within this area include beef cow/calf production, and woolgrowers that lamb and feed lambs. Other objectives of this veterinary position will include:

- Performing duties for state and federal disease control and eradication programs
- Participating in the Colorado veterinary emergency response team
- Performing duties for interstate movement of livestock, including commuter agreements

Please describe the activities of a veterinarian meeting this shortage situation and being located in the community, area, state/insular area, or position requested above (limit your response to 200 words or less).

The veterinary activities needed by the livestock producers in this Alamosa, Conejos and Costilla county area include:

- Provision of emergency veterinary services; for example livestock health care needs resulting from acute illness, trauma, dystocia or obstetrical difficulties
- Provision of routine veterinary services; for example vaccination, castration or dehorning
- Consultation in health care programs and nutrition
- Disease diagnostics for routine illness
- Disease surveillance and diagnostics for state and federal program diseases and for foreign animal diseases
- Completion of Certificates of Veterinary Inspection and animal health testing requirements needed in order to ship livestock in interstate commerce
- Provision of reproduction management consultation and services

Please describe any past efforts to recruit and retain a veterinarian in the shortage situation identified above (limit your response to 100 words or less).

Veterinarians in adjacent areas have utilized the national Veterinary Career Network, with assistance from Colorado State University and the Colorado Veterinary Medical Association, to try and place veterinarians in these counties. Graduate veterinarians have not seen incentive to practice or offer services within this tri-county area.

Please describe the risk of this veterinarian position not being secured or retained. Include the risk(s) to the production of a safe and wholesome food supply and to animal, human, and environmental health not only in the community but in the region, state/insular area, nation, and/or international community (limit your response to 250 words or less).

The risks associated with a lack of available veterinary services within a reasonable proximity of a producer's location in this Alamosa, Conejos and Costilla county area could include:

- A greater prevalence of disease, which increases the morbidity and mortality of food animals
- Reproductive losses, which would result in a monetary loss for the producer and the community
- The potential for the establishment and spread of a foreign animal disease due to the lack of timely surveillance and participation in Colorado emergency management activities
- The potential for the establishment and spread of a program or zoonotic disease due to the lack of timely surveillance and diagnostics
- A lack of the facilitation of interstate movement of animals through the issuance of a Certificate of Veterinary Inspection or commuter agreements

- Adulteration of food products due to the producer's lack of knowledge on the proper use of pharmaceuticals and veterinary biologic products
- Increased production costs resulting from a lack of consultation on nutrition, proper herd management and routine disease control

Please indicate whether you consider this situation/position a candidate for a "service in emergency" agreement (limit your response to 100 words or less). Please see solicitations for additional information regarding the obligation of participants who enter into the "Service in Emergency" agreement.

Authorized State or Insular Area Animal Health Official or designee:

Name: Keith A. Roehr, DVM

Title: Colorado State Veterinarian

Organization: Colorado Department of Agriculture

Email: Keith.roehr@ag.state.co.us

Telephone Number: 303.239.4166
(Area code required)

Public reporting for OMB control number 0524-0046 is estimated to average two hours, including the time for reviewing instructions, searching existing data sources, gathering and maintaining the data needed, and completing and reviewing the collection of information. An agency may not conduct or sponsor, and a person is not required to respond to, a collection of information, unless it displays a current valid OMB control number. Send comments regarding this burden estimate or any other aspect of this collection of information, including suggestions for reducing this burden to NIFA, OEP, 800 9th St. SW, Washington, DC 20024, Attention Policy Section. Do not return the completed form to this address.
